

To get a link to a file that you can copy and paste in a on a P2P application.

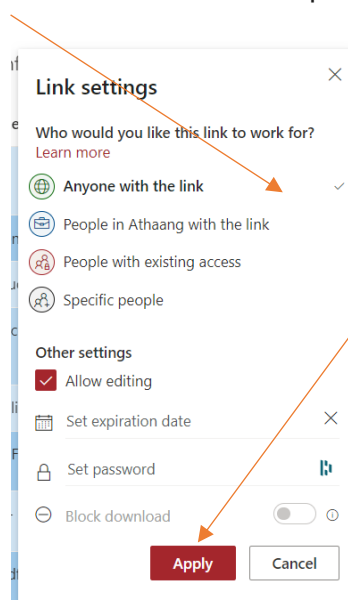

1. In DMS, select **Copy link**. The link is automatically copied to your clipboard.

2. **Click here**

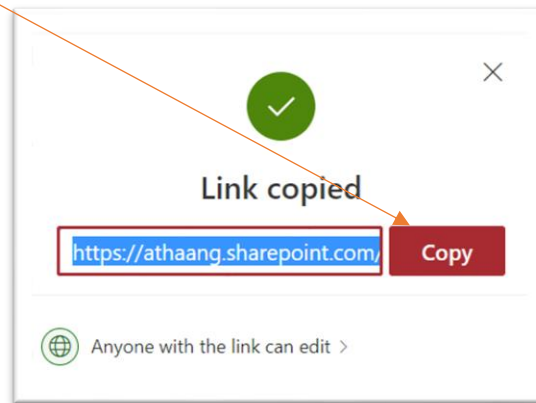

3. Select the **"Anyone with the Link"** from dropdown list. Click **Apply** button

We are enabling "Anyone" so that our parent companies who are not on the same domain can also be able to open the document.

4. Click **Copy**

5. Click **here** and **paste**, then click **Save** button
